FEDERAL CERTIFICATE

Accompany all Shipments

guaranteeing all stock free
from disease or pests.

P. I. 46.

COMMONWEALTH OF PENNSYLVANIA

DEPARTMENT OF AGRICULTURE

Bureau of Plant Industry

Nursery Certificate No. 12 (Resident)

THIS IS TO CERTIFY THAT THE NURSERY PREMISES

of Andorra Nurseries, Inc., Chestnut Hill Pa.,
including 1,000 acres of stock have been officially inspected and passed in accordance with the provisions of Act
of the General Assembly, approved the 10th day of March, 1927.

Permission is hereby granted this power to sell and ship nursery
stock, which has been officially inspected, for the year ending September
30th, 1930; provided that a tag on which an exact copy of this certificate
is printed must be attached to each package, bundle, bale, box or carload
lot so shipped.

This Certificate does not cover the requirements of any special quarantine or
regulation promulgated by this Commonwealth or by the United States Department
of Agriculture.

This Certificate is void after October 1, 1930, but may be revoked for cause.

Issued at the State Capitol, Harrisburg, Pa., September 19, 1929

F. M. Trumble
Chief Nursery Inspector

P. H. Bell
Director

*U*NDER the shade of Oaks, with a carpet of Japanese Spurge, Rhododendrons, Azaleas and shade-enduring plants can be massed with superb effect. Through this evergreen carpet spring flowering bulbs can be effectively used.

Directions for Ordering

Nomenclature
1923 Edition Standardized Plant Names

Give explicit directions as to address and mode of shipment. Shipments will be forwarded exactly as directed, but when without instructions, we will use our judgment in forwarding.

ALL ORDERS ARE ACCEPTED SUBJECT TO prior sale, and to conditions of stock at delivery date, under the following terms and conditions:

PRICES in this catalog cancel all previous lists and quotations and are subject to change without notice. **Prices include packing, except on special bulky pieces,** for which cost of packing will be extra, and are **f. o. b. our shipping station,** or for local delivery on our regular routes.

STOCK SPECIALLY SELECTED by customers at the Nurseries will be charged according to the value of the trees chosen, irrespective of catalog list price.

RATES.—Lots of 5 and 50 of a variety will be furnished at the 10 and 100 rates respectively. Where no price per single plant is quoted lots of less than five plants of any one sort are sold at the 10 rate, plus 50%.

TERMS, CASH WITH ORDER, except to persons who satisfy us as to their responsibility, when for your convenience **accounts will be opened due in 30 days from date of invoice.**

OVERDUE ACCOUNTS subject to interest at 6 per cent.

Forwarding and Shipping

SHIPPING SEASON opens about March 1st in the Spring and August 15th in the Fall.

WE WARRANT all goods to be true to name, full count, up to grade, and in good condition when shipped.

GUARANTEE.—We give no guarantee on the life of stock, as we have no control after it leaves our hands, and we will not replace stock without charge.

CLAIMS must be made within **five days** after receipt of goods. Stock delivered as per order and in good condition is not returnable.

GOODS IN TRANSIT.—All goods are at purchaser's risk after they are delivered to the forwarding companies and we receive their receipt for the shipment in good condition.

CLAIM FOR DAMAGE WHILE IN TRANSIT MUST BE MADE AGAINST THE DELIVERY COMPANY. Have delivery agent note the damaged condition on the freight bill, and present your claim promptly to the transportation company.

ANDORRA NURSERIES, Inc.
CHESTNUT HILL, PHILADELPHIA, PA.

The Planting Plans are as Important as the Building Plans

There is no doubt that the pleasure we derive from the contemplation or possession of living plants is increased a hundred-fold by skill in their arrangement in the places where they are finally to grow.

The greatest value that a plant can have is certainly not that of a museum specimen, but lies rather in its power to add comfort and attractiveness to the places where we live, work and play.

To all who have planting to do, from the simplest bit to the development of a large place, Andorra Nurseries strongly recommends the advice of a trained Landscape Architect.

From his experience in the use of plant material he can suggest those combinations and arrangements which will be fitting and wise to prevent costly and discouraging mistakes. Planning ahead is a guarantee of success.

An Invitation to Andorra

Those interested in trees and plants out-of-doors are always cordially welcome at Andorra. Excellent highways through this beautiful rolling section of Pennsylvania, with its charm of Colonial manor house and country-place, offer inviting roads from every direction to visitors in motor cars.

BY MOTOR from Philadelphia, go out the Parkway; along the East River Drive, continuing up the Wissahickon and Lincoln Drives to McCallum Street, turn left and follow through to dead end, turning right on Mermaid Lane and follow good road, turning left on St. Martins Lane, follow through turning right over bridge at Highland Station, continuing three blocks to Germantown Avenue. Turn left to City Line and then left one square to the Nursery.

TRAIN CONNECTIONS over the Chestnut Hill branches of both the Pennsylvania and Reading Railroads make Andorra a two-hour run out of New York and a half hour from the heart of Philadelphia to Chestnut Hill Stations; from Chestnut Hill a ten-minute ride on the City Line motor bus to City Line brings you within one block of the office.

EVERGREEN TREES

All Prices are for Stock of Our Selection. Customer's Selection
Will be Charged at Value of Stock Selected

ABIES concolor.

WHITE FIR. Tall, rapid growing; hardy rich silvery needles. For specimen or groups.

Specimens. Large and handsome—

10 to 12 ft.Each \$75 00 to 100 00

A. nordmanniana.

NORDMAN FIR. Tall; dark, glossy green foliage. Good specimen.

3½ to 4 ft.Each \$20 00

4 to 5 ft. 25 00

5 to 6 ft. 35 00

6 to 7 ft. 50 00

7 to 8 ft. 100 00

Specimens. Broad, spreading trees,

from 10 to 16 ft. in height.\$125 00 to 250 00

CEDRUS Atlantica.

MOUNT ATLAS CEDAR. Airy pyramidal tree with dark green foliage. Splendid as a specimen.

Specimens. 8 to 16 ft..Each \$75 00 to 200 00

C. atlantica glauca.

BLUE MOUNT ATLAS CEDAR. Airy pyramidal tree with silvery-green needles. Use as specimen.

Specimens. 10 to 20 ft...Each \$75 00 to 300 00

CRYPTOMERIA japonica, Drachioides.

JAPANESE TEMPLE CEDAR. Oriental in effect. As specimen or in groups.

Specimens. 18 to 25 ft.Each \$175 00 to 250 00

C. japonica lobbi.

LOBB CRYPTOMERIA. Tall and slender. Splendid for Winter effect of dark bronzing foliage. The beauty-loving Japanese use this stately evergreen especially for setting off their temples.

Specimens. 5 to 6 ft.Each \$25 00

Specimens. 6 to 7 ft. 35 00

Specimens. 20 to 22 ft. 300 00

Specimen Evergreens to be satisfactory to you must be transplanted stock with good roots. You are purchasing for results.

HYBRID RHODODENDRONS—ANDORRA-GROWN

Andorra's Hybrids, in sizes 3 feet and under, are Andorra-grown from layers. This places *every plant on its own roots*, and every bud and shoot, no matter how low it may come on the stem, is the true variety. We believe this is the only stock of layer-grown plants offered.

10 to 12 ft.; 1½ to 2 in.	Each \$3 50	30 00
10 to 12 ft.; 2 to 2½ in.	4 00	35 00

THE NORWAY MAPLE is a most valuable tree for lawn or street planting, where quick results are desired. It is of rugged constitution giving good results in positions where other trees will not thrive, and carrying broad, heavy, foliage, it is most useful either for shade or for screen purposes.

We offer the following sizes in trees which have been thoroughly root pruned so that they carry an abundance of fibrous feeding roots.

The tops have been cut back and thoroughly pruned, thus developing heavy stems and bushy tops, making a tree which we term **extra heavy**, as compared with the average Norway Maple.

The stock in the smaller sizes is limited, but in the grades from 3-inch caliper up, we can supply large quantities. We will be glad to make special prices for quantity lots, or for carload shipments.

ACER platanoides.

NORWAY MAPLE. Rapid growing; symmetrical; valuable for lawn, street and avenue planting; holds its rich green leaves till late in Fall taking on rich yellow tones.

------------------	--------------

THE SWEET MAGNOLIA

MAGNOLIA GLAUCA

A BEAUTIFUL, small, shrubby tree, thriving in any good soil or situation, and useful for positions too damp for many trees. The rich, glossy green foliage is glaucous beneath, giving the whole a silvery sheen. The cream-white, waxlike flowers are highly fragrant, and the seed-pods which follow open to show brilliant coral seeds.

Used in masses with evergreens, in the shrub border, as hedges or for specimens, it gives added pleasure to any planting.

4 to 5 ft.	2 00	15 00

Trees for Screens and Windbreaks

By properly planting trees of quick-growing varieties in combination with slower growing, more permanent sorts, it is easily possible in a few years time effectively to blot out objectionable views which mar the outlook from house or lawn, at the same time, by planting flowering trees, evergreens or shrubs on the lawn side, producing an added attractive landscape feature.

Old English Boxwood

Buxus suffruticosa

A Specimen 8 feet high, 10 feet spread

The Old English Boxwood Co. on the

York Road at Cockeysville, Maryland

OFFER the largest and we believe the finest collection of Dwarf Boxwood ever assembled. Over 7000 plants; *and every plant transplanted within the past three years insuring good roots.*

SPECIMENS in all sizes, from two and three foot dense pieces, up to regular and billowy pieces ten feet in height and twenty feet in spread.

SPECIMENS with all the charming character that is found in century old plants in superb condition.

ALSO HEDGES ready for your grounds in varying heights and widths.

14 to 16 ft.; 3½ to 4 in.	20 00	185 00

A WELL PLANTED APPROACH.

ANDORRA LANDSCAPE DEPT.

THE CHARM of informal small shrub planting is shown here. The pendulous form, softness of outline and richness of color of *Abelia*, *Azalea* and *Barberry* massed under an occasional *Pine* and flowering tree, make this walk delightful and full of surprises at all seasons of the year. An unimportant and unattractive side of the house may thus be turned into a spot of beauty.

SORBARIA sorbifolia.

URAL FALSE SPIRAEA. Vigorous shrub, large compound leaves; white flowers in Summer.

4 to 5 ft.	Each \$1 00	7 50
-----------------	-------------	------

SPIRAEA.

A species of shrubs useful in every place—in garden, or singly and massed in border plantings. They include medium and dwarf varieties, blooming from early Spring to mid-Summer.

S. bumaldi.

BUMALDA SPIRAEA. Dense broad growth; rosy pink flowers in July.

2½ to 3 ft.	Each \$1 50	7 50
------------------	-------------	------

S. bumaldi Anthony Waterer.

WATERER SPIRAEA. A medium grower; rose-pink flowers in Summer; for garden or borders.

2 to 2½ ft. Heavy	Each \$1 50	10 00	75 00
2½ to 3 ft. Heavy	2 00	15 00	85 00
3 to 3½ ft. Heavy	2 50	20 00	100 00

S. frobelli.

FROBEL SPIRAEA. A stronger grower than "Anthony Waterer;" blooms of same color in July and August.

3 to 4 ft.	Each \$1 50	10 00	75 00
-----------------	-------------	-------	-------

SPIRAEA prunifolia.

BRIDAL WREATH. Tall grower; shining green foliage; white blossoms in May.

		Per 10	Per 100
3 to 4 ft.	Each \$1 00	\$7 50	\$40 00
4 to 5 ft.	1 50	10 00	60 00

S. reevesiana fl. pl.

REEVES DOUBLE SPIRAEA. Pure white double blooms in May and June.

4 to 5 ft.	Each \$1 50	10 00	60 00
5 to 6 ft.	2 00	12 50	

S. thunbergi.

THUNBERG SPIRAEA. Medium shrub; spreading branches; light green foliage; pure white flowers in earliest Spring.

2 to 3 ft.	Each \$1 00	7 50	40 00
3 to 4 ft.	1 50	10 00	50 00
4 to 5 ft.	2 00	12 50	

S. van houttei.

VAN HOUTTE SPIRAEA. Medium height; of merit for lawn specimen or massing; white flowers in May.

2 to 3 ft.	Each \$0 75	4 00	35 00
3 to 4 ft. Heavy	1 00	6 00	45 00
4 to 5 ft. Heavy	1 50	10 00	60 00
5 to 6 ft. Heavy	2 50	20 00	85 00

STAPHYLEA colchica.

COLCHIS BLADDER NUT. Tall growing; fragrant white flowers in late Spring; attractive seed pods.

4 to 5 ft.	Each \$1 00	8 50	
-----------------	-------------	------	--

STEPHANANDRA flexuosa.

CUTLEAF STEPHANANDRA. Of great value for its fine cut, lacy foliage, where daintiness is desired.

2 to 3 ft.	Each \$1 00	7 50	
3 to 4 ft.	1 50	10 00	

STEWARTIA pentagyma.

A handsome shrub, large, dark green foliage; brilliant in Autumn; cup-shaped white blooms in mid-Summer.

2½ to 3 ft. Rare	Each \$3 50		
3 to 4 ft.	5 00		

STYRAX japonica. (See page 59.)

SYMPHORICARPUS chenaulti. NEW.

RED FRUITED. Arching branches giving fountain-like effect, slender twigs, fruit red and pink.

		Per 10
3 to 4 ft.	Each \$3 50	\$30 00

S. mollis.

SPREADING SNOWBERRY. Spreading habit; large white fruit.

			Per 100
4 to 4 ft.	Each \$0 75	5 00	\$35 00
5 to 6 ft.	1 00	7 50	40 00

S. racemosus.

SNOWBERRY. Low, shade-loving plant; large white berries in Fall and carried through the Winter.

2 to 3 ft.	Each \$0 75	5 00	35 00
3 to 4 ft.	1 00	7 50	40 00

S. vulgaris.

CORAL BERRY. Dwarf shrub thriving in shade; coral-red berries persistent until late Winter.

2 to 3 ft.	Each \$0 75	5 00	35 00
3 to 4 ft.	1 00	7 50	40 00

SYMPLOCUS crataegoides.

TURQUOISE BERRY.

1½ to 2 ft.	Each \$2 50	20 00
------------------	-------------	-------

SYRINGA. LILAC.**S. japonica.**

JAPANESE TREE LILAC. The familiar lilac blossoms on a small tree. For enlivening screen border.

6 to 7 ft.	Each \$4 00	32 50
7 to 8 ft.	5 00	40 00
8 to 9 ft.	7 50	60 00
9 to 10 ft.	10 00	80 00
10 to 12 ft.	15 00	

S. josikea.

HUNGARIAN LILAC. Tall growth; heavy dark green foliage; late purple flowers.

4 to 5 ft.	Each \$3 50	30 00
5 to 6 ft.	5 00	40 00

S. villosa.

LATE LILAC. Vigorous bush; late May bloomer; light purple in bud and white when opened; fragrant.

5 to 6 ft. Heavy	Each \$5 00	40 00
6 to 7 ft. Heavy	7 50	60 00

SYRINGA vulgaris.**COMMON PURPLE LILAC.** An old-fashioned favorite of well-proven worth.

		Per 10	Per 100
2 to 3 ft. Heavy	Each \$1 50	\$12 50	\$100 00

4 to 5 ft. Heavy	2 50	22 50	200 00
5 to 6 ft. Heavy	\$5 00 to 7 50		
7 to 9 ft. Heavy	\$10 00 to 15 00		

S. vulgaris, var. alba.**COMMON WHITE LILAC.** Similar to type.

3 to 4 ft. Heavy	Each \$2 00		
4 to 5 ft. Heavy Clumps	3 50	30 00	

HYBRID VARIETIES OF LILACS**Arthur W. Paul.** Double. Violaceous red.

2 to 2½ ft.	Each \$2 50	20 00	
------------------	-------------	-------	--

Chas. Jolly. Double. Dark red.

1½ ft.	Each \$2 00	16 50	
2 to 3 ft.	3 50		

Colbert. Double. Clear cardeau.

2 to 2½ ft.	Each \$2 50	20 00	
2½ to 3 ft.	3 50	30 00	

Frau Bertha Damman. Single. White.

3 to 4 ft.	Each \$2 50		
4 to 5 ft.	3 50		
5 to 6 ft.	\$5 00 to 7 50		
7 to 8 ft.	\$8 50 to 10 00		

Maxime Cornu. Double. Rosy lilac.

2 to 3 ft.	Each \$2 50	20 00	
3 to 4 ft.	3 50	30 00	

Michel Buchner. Double. Pale lilac.

2 to 3 ft.	Each \$2 50	20 00	
3 to 4 ft.	5 00		

Mme. Abel Chatenay. Double. White.

2½ to 3 ft.	Each \$2 50	20 00	
3 to 4 ft. Heavy	5 00		

Mme. Casimir Perier. Double. Cream.

2 to 3 ft.	Each \$2 00	16 50	
3 to 4 ft.	3 50	30 00	
4 to 5 ft.	5 00	45 00	

Mme. Lemoinei. Double. White.

2 to 3 ft.	Each \$2 00	16 50	
3 to 4 ft.	3 50	30 00	
4 to 5 ft.	5 00	45 00	

Pres. Grevy. Double. Blue.

2 to 3 ft.	Each \$3 50		
-----------------	-------------	--	--

Rubra de Marlay. Single. Reddish purple.

3 to 4 ft.	Each \$3 50	30 00	
4 to 5 ft.	5 00	45 00	

Senator Volland. Double. Rosy red.

2½ to 3 ft.	Each \$3 50	30 00	
------------------	-------------	-------	--

TAMARIX africana. (parviflora.)

AFRICAN TAMARIX. Reddish-brown bark,
slender spreading branches, flowers pink.
2 to 3 ft.Each \$1 00 Per 10
\$7 50

T. amurense.

AMUR TAMARIX. Glauous green foliage;
flowers pink.
2 to 3 ft.Each \$1 00 7 50

T. odessana.

ODESSA TAMARIX. Bluish-green foliage.
Pink flowers in August.
5 to 6 ft.Each \$2 00 15 00

VIBURNUM. See page 38 for evergreen varieties.

V. acerifolium.

MAPLELEAF VIBURNUM. Dwarf, spreading
by root stems; white flowers; fruit black.
Useful in shade places.
2 to 3 ft.Each \$1 00 6 00 Per 100
\$50 00

V. carlesii.

FRAGRANT VIBURNUM. Compact, bushy
growth. Bouvardia pink flowers of exquisite
fragrance.

"Andorra grown are guaranteed to be the
fragrant type."

1½ ft to 2 ft. Each, \$3.50; per ten, \$30.00.

V. cassanoides.

WITHE-ROD. Flowers creamy white. Ber-
ries pink changing to blue. Excellent for
waterside planting or the shrub border.
3 to 4 ft.Each \$1 00 5 00
4 to 5 ft.1 50 7 50

ANDORRA LANDSCAPE DEPT.

HARDY HERBACEOUS PERENNIALS

This List Conforms with 1923 Edition Standardized Plant Names

N. B. Quantities of 5 and 50 OF A VARIETY will be furnished at the 10 and 100 rates, respectively.

LESS THAN FIVE PLANTS OF ONE SORT ARE SOLD AT THE TEN-RATE, PLUS 50%.

THERE is a strong appeal in the gardens of old farmhouse and cottage, with the glowing yellow and orange Day-lilies, bright flowered Phlox and Peonies, and their show of hardy Chrysanthemums; a demonstration of the ease with which these plants are grown and the little care they require when one thinks how little time the busy country housewife can spend in gardening. The old-fashioned perennials have been enriched with many improved varieties and species, and every corner of the grounds can be kept bright throughout the whole growing season; the tall growing varieties can be effectively planted in the shrubberies, their flowers showing

against the background of evergreen or shrub, and the lower sorts blending the edge of shrubbery and lawn in naturalesque borders, or the wood edge made gay with some of the Asters, Foxgloves, Ferns and many others.

Of flowering plants, two things are demanded—Varieties which will brighten our lawns and gardens, and which can be cut for house decoration—these hardy herbaceous plants reward us bounteously in both requirements. The height, color and flowering season of each variety are given in the following list.

SINGLE PLANTS 50c. EACH

	Per 10	Per 100
ACHILLEA millefolium roseum, var. Cerise Queen. June to September. Amaranth-red. 1½ ft. ..	\$2 50	\$12 00
A. ptarmica (Sneezewort). All Summer. White. 2 ft.	2 50	12 00
ACONITUM Fischeri (Azure Monkshood). Sep- tember. Blue. 3 to 4 ft.....	3 50	25 00
A. napellus (Spark's Variety). June. Dark blue. 2 to 3 ft.	3 50	
A. wilsoni. Tall grower; pale blue.....	5 00	
AJUGA genevensis (Geneva Bugle). May. Bright blue. 6 in.	2 50	15 00
ALTHÆA rosea (Hollyhock). July. Various col- ors. 4 to 6 ft. Also in distinct colors, single Pink and Red, Double Yellow, Newport Pink, White, Single Pink, Red and Frilled.	2 50	15 00
ALYSSUM saxatile compactum. (Goldentuft.) May and June. Yellow. 1 ft.....	2 50	12 00
ANCHUSA italica, var. Dropmore (Bugloss). New. May and June. Blue. 3 to 4 ft.....	3 50	20 00
A. myosotidiflora. April and May. Blue 10 to 12 in.	3 00	20 00
ANEMONE hupehensis. All summer. Mauve-rose. 1½ to 2 ft.	3 00	18 00
A. japonica alba. Wind flower. 2 to 3 ft.	3 50	18 00
A. japonica rosea. Wind flower. 2 to 3 ft.	3 50	18 00
A. whirlwind. Double wind flower. 2 to 3 ft. (from pots).	2 50	18 00
ANTHEMIS tinctoria (Chamomile). June to Sep- tember. Golden Yellow. 2 ft.	2 50	15 00
AQUILEGIA californica. Pink and rose. Long spurs	2 50	15 00
A. canadensis (native columbine). Red and yellow. 2 ft.	2 50	15 00

AQUILEGIA chrysantha. May to August. Golden yellow. 3 ft.	Per 10 \$2 50	
A. coerulea. Blue. 1½ to 2 ft.	2 50	Per 100 \$15 00
A. Mrs. Scott Smith's Long-spurred Hybrids.	3 50	20 00
A. nivea grandiflora. Pure white.....	3 50	20 00
ARABIS alpina (Rock Cress). April and May. White. 4 in.	2 50	15 00
ARMERIA formosa. Summer. Rosy pink. 9 inches	2 50	15 00
A. cephalotus latifolia. Pink.....	2 50	
A. maritima, var. splendens. Thrift. Summer. Rose. 9 in.	2 50	15 00
ASCLEPIAS tuberosa. (Butterfly Weed). July and August. 2½ ft.	3 50	
ASTER alpinus. Purple. June, July. 9 in.....	2 50	15 00
A. amethystinus. September and October. 3 to 4 ft.	2 50	15 00
A. mauve cushion (Japanese Hardy Aster). October and November. Mauve. 9 in.....	3 00	20 00
A. Mother of Pearl. September and October. Mauve pink at edges. 2 to 3 ft.....	3 50	20 00
A. novæ angliæ. September and October. Purple. 4 ft.	2 50	15 00
A. novæ angliæ rubra. October. Red. 3 ft.....	2 50	15 00
A. Robt. Parker. Lavender. September and October. 3 to 4 ft.	2 50	15 00
A. tataricus. October and November. Purple. 5 ft.	3 50	18 00
AUBRETIA hendersoni. (False Wallcress). April Purplish violet. 4 in.	2 50	18 00
BAPTISA australis. Falseindigo. June and July. Dark Blue. 2 ft.	2 50	15 00
BELLIS perennis. The Bride. June. Double White. 6 in.	2 50	15 00
B. perennis. Longfellow (Red). 6 in.....	2 50	15 00
BOCCONIA cordata (Plume Poppy). July and August. Creamy white. 4 to 6 ft.....	2 50	18 00
BOLTONIA asterioides (False Chamomile). August and September. White. 4 ft.....	2 50	15 00
B. latisquama. August and September. Lilac....	2 50	15 00

CAMPANULA <i>carpathica</i> . Blue. June to September	Per 10 \$2 50	Per 100 \$15 00
C. <i>carpathica alba</i>	2 50	15 00
C. <i>glomerata</i> (Danesblood). August. 1 to 2 ft..	2 50	15 00
C. <i>media calycanthema</i> . Blue, white, pink. 18 in.	2 50	15 00
C. <i>persicifolia</i> (Peach Bells). June and July. Blue. 18 in.	2 50	15 00
C. <i>persicifolia alba</i> . June and July. White. 18 in.	2 50	15 00
C. <i>trachelium</i> . Deep purple. 2 to 3 ft.....	2 50	15 00
CENTAUREA <i>dealbata</i> (Knapweed). July to September. Bright rose. 18 in.	2 50	20 00
C. <i>montana</i> (Mountain Bluett). June and July. Dark purple. 1½ ft.	2 50	15 00
CERASTIUM <i>tomentosum</i> . June and July. White. 6 in.	2 50	15 00
CERATOSTIGMA <i>plumbaginoides</i> . (Plumbago). October and November. Blue. 6 in.....	2 50	15 00
CHELONE <i>Lyoni</i> (Turtlehead). August and September. Rose purple. 3 ft.	3 50	18 00
CHRYSANTHEMUM. Hardy varieties. Special list—page 102.		
CHRYSANTHEMUM <i>leucanthemum hybridum</i> (Shasta Daisies). Alaska, Westralia, California. All Summer. White. 2 ft.....	2 00	15 00
CIMICIFUGA <i>acerinum</i> . (Snakeroot). August and September. White. 2½ ft.....	2 50	15 00
C. <i>racemosa</i> . (Cohosh Bugbane). July and August. Pure White	2 50	15 00
CLEMATIS <i>crispa</i> (Curly Clematis). June to September. Lavender. 3 to 4 ft.....	3 50	18 00
CONVALLARIA <i>majalis</i> (Lily-of-the-Valley). May and June. White. 6 to 9 in.....	3 50	25 00
COREOPSIS <i>lanceolata</i> (Tickseed). June to October. Golden yellow. 2 ft.	2 50	15 00
CRUCIANELLA <i>stylosa</i> (Crosswort). Early bloom. Bright purple. 6 in.	3 50	20 00
DELPHINIUM <i>belladonna</i> . June. Blue. 2 to 3 ft.	2 50	15 00
D. <i>bellamosum</i> . Dark Blue	2 50	15 00
D. <i>formosium</i> . June. Deep Blue. 3 to 4 ft....	2 50	15 00
D. <i>chinense</i> (Larkspur). July to September. Blue. 1½ ft.	2 50	15 00
D. <i>chinensis</i> . White	2 50	15 00
D. Gold Medal Hybrids	2 50	15 00

VINCA minor (Periwinkle). May. Bright blue. Spreading	2 50	15 00

SPECIAL NOTE

All perennials offered are heavy field grown stock, or if potted stock, are heavy plants, suitable for immediate effect.

HARDY FERNS

50c each; \$3.50 per 10; \$25.00 per 100

ADIANTUM pedatum (Maidenhair Fern). 1 to 2 ft. Moist, shaded positions.

ASPIDIUM acrostichoides (Christmas Fern). 1 to 2 ft. Evergreen. Dry or moist soils in shady places.

A. Felix-mas (Male Fern). 2 ft. Semi-shaded positions, dry or moist soils.

A. Goldianum. 2 to 4 ft. Semi-shaded positions, dry or moist soils.

A. marginale. Evergreen. 1 to 2 ft. Shaded positions, dry or moist soils.

ASPLENIUM Filix-fœmina (Lady Fern). 2 to 3 ft. Open or shaded positions, in moist or dry soils.

BOTRYCHIUM virginianum (Moonwort). 6 to 12 in. Shaded positions, moist or dry soils.

DICKSONIA punctilobula (Boulder Fern). 2 to 3 ft. For open positions; forms large plantations.

ONOCLEA sensibilis (Sensitive Fern). 1 to 2 ft. For open planting and wet soils.

O. Struthiopteris (Ostrich Fern). 2 to 4 ft. For open positions, dry or moist soils.

OSMUNDA gracilis (Flowering Fern). 2 to 4 ft. Open or shaded positions, and moist soils.

O. Claytoniana. 2 to 5 ft. For open plantings, dry or moist soils.

O. cinnamomea (Cinnamon Fern). 2 to 5 ft. For open or shaded positions, in wet soils.

O. Regalis (Royal Fern). Wet positions. Sun or shade. 2 to 3 ft.

PHEGOPTERIS hexagonoptera. For shade. 1 ft.

POLYPODIUM vulgare (Polybody). For rock work. 4 to 10 in.

WOODSIA obtusa. 6 to 12 in. Shady places, in moist soil.

WOODWARDIA angustifolia (Chain Fern). 1 ft. Open or shaded positions, in moist soils.

FLOWER GARDEN—ALDEN PARK MANOR.

EVERGREENS within a garden. They make a delightful background for the rich coloring in the flower borders. The enclosing hedge is of Hemlock; the beds are edged with Box, and Specimen Box Bush mark important corners. The pool is bordered with Prostrate Junipers (*J. sabina tamariscifolia*).

HARDY CHRYSANTHEMUMS

When frost has browned the other flowers of the garden, these hardy plants burst forth in a profusion of bloom, in colors which seem to catch the most delicate tints and shades of bronzing leaf and gorgeous Autumn sunset, while some foretell the purest white of coming snow, and pink of purpling shadows.

Planted in the hardy garden, border or lawn at edge of shrubbery, they will yield a wealth of bright flowers in late Autumn, and fill the house with cut flowers.

50c each; \$2.50 per 10; \$15.00 per 100

- Adele—Deep bronze.
- Allentown—Bronze yellow.
- Blushing Bride—Clear pink.
- Dupont D. Levue—Orange.
- Genevieve Lonas—Pink.
- Inga—Dark red.
- Jessie Patterson—Rose.

- W. M. Westlake—Golden yellow; reddish tint.

A JAPANESE IRIS GARDEN.

A Very Satisfactory Way to Utilize an Old Pond Bed or Bog

JAPANESE IRIS (*Iris kaempferi*)

75c. each; \$4.00 per 10 OF ONE VARIETY

\$35.00 per 100 in not less than 10 of a Variety

Of all the Iris family none equal the Japanese. The large blooms, carried well above the foliage, are gorgeous in their coloring, which ranges from purest white to deep purples, indigo blues and mahogany red, between which there is a wonderful array of tints and mottlings. To see our collection a visit to Andorra in June is worth while; or, better, buy a full set.

Dinah. Reddish purple, flaked with white.

Gold Bound. White.

Mahogany. Deep, velvety, mahogany red.

Oriole. Purple amaranth.

Princess Clothilde. Ash gray blushed with purple.

Pyramid. Deep violet-purple veined with white.

Robert Craig. French gray, base of petals tinted with violet.

Snow Bound. White.

Templeton. Six-petaled, violet-purple, marbled with white.

Vesta. Reddish-purple.

Victor. Porcelain veined with blue.

Zenobia. Light ground suffused with reddish purple.

DOUBLE PEONIES

	Each	Per 10
Adlae Adamson. No. 352. Flesh rose.....	\$0 75	\$5 00
Ambrose Verschaffelt. No. 325. Purple-crimson, very full fragrant flower	1 00	7 50
Arthemise. No. 313. Rose pink.....	75	5 00
Brennus. No. 337. Crimson, semi-double	75	
Charles Verdier. Carmine flushed with bright violet	75	5 00
Comte de Diesbach. No. 464. Purplish-crimson	75	
Duchesse de Nemours. No. 458. Sulphur-white with greenish reflex fading to pure white. Late	1 50	10 00
Duchess D. Thebas. No. 363. Flesh white guard petals; centre creamy yellow.	1 00	7 50
Duke of Wellington. Sulphur-white	75	5 00
Festiva Maxima. Paper-white, crimson flaked....	75	5 00
Fulgidi. No. 311. Crimson purple; semi- double	75	
Gloire de Douai. No. 456. Purplish scarlet....	75	
Lady Bramwell. No. 305. Silvery rose, good size and substance, prolific bloom	1 00	
Lady Winborne (Kelway) No. 416. Fine pearly blush pink	1 50	10 00
Louis D'Estree No. 477. Deep rosy-pink. Fra- grant	75	5 00
Louis Van Houtte. No. 516 (Calot). Bright pur- ple-cherry, large, globular, full, fragrant- superb, late	75	
Mme. Bollet. No. 312. Flesh rose with white reflex	1 50	10 00
Mme. Chaumy. No. 329. Satiny rose, center flesh	75	6 00

	Each	
Mad. Courante. No. 316. Rich flesh color.....	\$1 00	
Mme. Coste. No. 348. Guard petals soft pink; tufted center, tinted glossy sulphur-white....	1 50	Per 10
Mad. Ducel. No. 328. Salmon rose. Dwarf early	1 00	\$7 50
Faust. No. 330. Flesh	75	5 00
Mme. De Veroneville. Sulphur white.	1 50	12 50
Mme. Lebon. No. 331. Bright cherry-red with satiny tint, enormous flower	75	5 00
Mme. Vilmorin. No. 343. Guard petals blush, center peach blush flaked with crimson.....	75	
Marie Houillon. No. 324. Light satiny rose.....	75	5 00
Modeste Guerin. No. 332. Cherry rose, large full globulous flower sweet.....	75	5 00
Ne Plus Ultra. Bright, clean flesh rose.....	75	5 00
Octave Demay. No. 314. Soft flesh pink.	1 50	
Paul Verdieri. No. 319. Dark crimson.	75	
Prince Imperial. No. 322. Purplish scarlet.....	1 50	12 50
Rose Quintal. Carmine rose.	75	5 00
Rubra Triumphans. No. 484. Dark purplish crim- son. Semi double-mixed	75	5 00
Saturnalia. No. 323. Lilac rose, silvery tinted...	75	5 00
Siidonie. No. 327. Lilac-rose	75	5 00
Sosthenes. No. 356. Light rose—edged white...	75	
Tricolor-grandiflora. No. 386. Salmon pink, Late	75	5 00

SINGLE PEONIES

The single varieties have been much neglected in favor of the double sorts, but they are quite as showy, especially for massing in the shrubby borders, holding their blooms well above the foliage, giving flowers of delicate texture and color.

	Each	Per 10
Amiable. Delicate rose-pink.....	\$0 75	\$5 00
Comus. Light purple	75	5 00
Corallina. Rosy purple.	75	5 00
Eclat. Purple. Wide petals.....	75	5 00
Josephine. Bright rose.....	75	5 00
Lucrinus. Rich crimson. Tall grower.....	75	5 00
Mardonius. Bright crimson. Dwarf grower.....	75	5 00
Medusa. Rosy lilac	75	5 00

PHLOX

PHLOX PANICULATA—HYBRID PERENNIAL PHLOX

A succession of flowers of greatest beauty from early July until frost, in softest tones of pink and rose, salmon, mauve and silvery white in great paniced blooms, will brighten the hardy border of mixed varieties of Phlox. Easy of culture, and perfectly hardy, the plants can be used at the edge of shrub border or in the garden, spaced about eighteen inches apart.

Assortment in Mixed Colors of Our Selection
\$10.00 per 100

THE FOLLOWING CHOICE VARIETIES

50c each; \$2.00 per 10 of a variety; \$15.00 per 100, not less than 10 of a variety at the 10 rate

- Anna Cook.** Soft lilac pink.
- Argon.** Salmon rose. Early. Dwarf.
- Beacon.** Cherry red.
- B. Comte.** Intense purple-crimson. 35c. each.
- Candeur.** Pure white. Dwarf.
- Caran d'Ache.** Dwarf, early. Rosy-crimson.
- Champs-Elysees.** Intense rich purple-crimson.
- Eclaireur.** Tall, early. Crimson-purple, rosy-white centre.
- Elizabeth Campbell.** Salmon-pink, light shadings, dark eye.
- Frau. Buchner.** Dwarf. Pure white.
- Girondin.** Dark carmine rose.
- Henri Murger.** Large, pure white; large carmine centre; very fine.
- Independence.** White.
- La Fue de Monde.** Flame color.
- La Vague.** Clear silvery rose.
- Mad. P. Langier.** Salmon-pink, dark eye.
- Miss Lingard.** Tall, early; fine, free flowering, white.
- Mrs. Wm. Jenkins.** White.
- Ornament.** Early, Clear rose.
- Pantheon.** Rose.
- Prof. Schlieman.** Bright lilac rose. Late.
- Prof. Virchow.** Carmine, overlaid with orange-scarlet.
- R. P. Struthers.** Bright, rosy-carmine, claret-red eye.
- Rynstrom.** Pink.
- Thor.** Deep salmon pink, with scarlet glow.
- Widar.** Reddish-violet. White centre.

INSECTICIDES

All prices are subject to change without notice.

Sunoco Spray Oil

A heavy oil which readily gives a permanent and uniform emulsion when mixed with water. For all scale insects, mealy bugs, woolly aphids, mix at strength of one part oil to twenty parts of water (1 qt. to 5 gallons). This also kills the eggs and prevents Summer infestations of red spider, aphids and many other insects. January, February and March are favorable months for this treatment, but the late Fall, just after the leaves drop, is just as good. It is also used as a Summer spray and as a spreader for Bordeaux, lead arsenate or nicotine sulphate. Do not use with lime sulphur.

1/2 gallon cans	@	\$0.85
1 gallon cans	@	1.50
5 gallon cans	@	5.75
15 gallon drums	@	.70 per gallon
30 gallon drums	@	.60 per gallon
50 gallon drums	@	.50 per gallon

COATED ARSENATE OF LEAD. Patented. A thorough protection against JAPANESE BEETLES. One thorough spraying will protect the foliage during the Beetle season. Coated Arsenate of Lead has great sticking qualities, one spraying will be sufficient protection during the season. Use at the rate of five (5) pounds to fifty (50) gallons of water, or, one-half (1/2) pound to five (5) gallons.

1 lb. jar	@	\$0.60
2 1/2 lb. jar	@	1.10
25 lb. package	@	6.25
100 lb. package	@	17.00

Place your orders now for next Spring's delivery as the demand will be heavy.

LEAD ARSENATE. A powder. An internal poison for destruction of leaf-chewing insects and fruit feeders, such as codling moth, curculio, bag worms, walnut caterpillars, tent caterpillars, tussock moth, potato bugs and many others. Use 2 to 3 lbs. per fifty gallons of water.

4 lb. bags	@	\$1.50
48 lb. cartons	@	14.00

BORDEAUX-LEAD ARSENATE combination. A powder. The insecticidal and fungicidal properties of these two materials, as previously described, are brought together in this useful combination. Use 3 to 6 lbs. to 50 gallons of water.

4 lbs.	@	\$1.75
-------------	---	--------

PARADICHLOROBENZENE (P. T. B.). Small crystals. Apply these about base of trees for control of borers in peach and cherry (not apple). Use from $\frac{1}{2}$ to 1 ounce per tree. It may be used with perfect safety on very young (2-year-old trees) if raked from about trunk at end of three weeks. Directions on cans.

5 lbs.	@	\$2.50
10 lbs.	@	4.50
25 lbs.	@	11.00
100 lbs.	@	33.00

NICOTINE SULPHATE (40%). A liquid. Aphids and all kinds of soft-bodied insects and some midges and same larvæ which do not come in this category are most effectively destroyed by this contact poison when used one part to 800 of water (1 or 2 teaspoonfuls per gallon). Makes a fine combination with Sunoco Spray Oil for control of box leaf miner and lace bugs. Roses, chrysanthemums, nasturtiums and other flowers should be sprayed with it regularly throughout the summer. Full directions on can.

$\frac{1}{2}$ lb. can	@	\$1.25

PLANTING INSTRUCTIONS

Introduction : Many of our customers, after the receipt of goods, write or telephone us for some suggestions for the proper planting of the material in hand, and in order that the proper information may be at hand so that the stock can be promptly and properly cared for, we have written the following brief but complete instructions, which if followed will insure satisfactory results.

The Whole Subject of Successful Planting

may be briefly summed up as follows: Use Andorra-grown Trees, Shrubs and Plants; a well-drained hole larger than the spread of the roots; good soil, broken roots carefully trimmed and the top branches shortened in; soil packed so that the tree stands quite firm; a heavy mulching as soon as the planting is completed; careful watering during the first season, and thorough cultivation afterward.

On Arrival of the Shipment at once (except in freezing weather, when they should be placed in a cellar or other protected place to thaw out before unpacking), and if the stock cannot be planted at once it should be "heeled-in," taking care to protect the roots from the sun and winds. To do this, select for a heeling-in ground a location where there is good drainage; dig a trench from 1½ to 2 feet in depth and of sufficient width to accommodate the roots without bending them. In this trench set the trees close together, covering the roots carefully and thoroughly with soil, taking care that it is well worked in about them so as not to leave vacant spaces; then mound the soil along the line of trench, so that it will turn off the water in case of heavy rains. This is of special importance where the trees are to remain heeled-in any length of time.

Preparing to Plant. The most important point is the preparation of the hole; this should be dug at least a foot or two wider than the spread of roots of the tree to be planted, a very large specimen, when it should be proportionately deeper, and in the bottom of the hole the soil should be well loosened. Where the soil is not good, a much larger excavation should be made, and refilled with first-class soil. Should the planting space be in a clayey soil, the bottom of the hole should be thoroughly loosened, if possible, digging or blasting entirely through the clay; if not, then dig deep enough to fill in with stone or other loose material to provide proper drainage, which is most important.

Kind of Soil. A frequent question is "what kind of soil to use and with what to enrich it." Just here we would emphasize the fact that too much care cannot be taken with the preparations for planting. It is absolutely necessary that the tree be given an abundance of good soil if one would attain satisfactory

results. The best is that stripped from an old meadow, where the sod and topsoil can be taken together. It is always advisable, where much planting is done, to have a compost heap prepared the season previous by putting soil and manure in alternate layers, and turning the pile two or three times in the season to thoroughly mix them and prevent the manure burning out. When either of these kinds of soil is not procurable, old thoroughly rotted manure can be mixed with the soil for planting, but in no case should fresh manure or patent fertilizers be used.

When Setting the Tree take care that all broken portions of the roots are cut off in a clean, careful manner, cutting from the under side upward and using a pruning knife in preference to shears; than spread the roots in a natural position, taking care that the small fibers are not twisted or crowded. Fill in with good, fine soil, which should be worked carefully under the roots, so that no spaces remain unfilled. Be careful not to plant too deep. The tree will generally show by the soil mark on its bark the depth at which it stood in the nursery, and it should not be set more than two or three inches deeper. As the soil is filled in by layers, it should be carefully and firmly packed until the hole is filled to within an inch or two of the top. If it is dry weather the watering should now be done, and then the last of the soil spread without packing it. This loose top soil will act as a mulch and help to retain the moisture.

After Planting. As soon as the hole is filled and the tree has been properly and firmly set, spread over the surface a layer 3 to 4 inches thick of either old or fresh manure, to extend a foot or two beyond the line of the newly-filled hole. This mulching is important, as it will shade the ground and help to hold the moisture, and moisture is, after careful planting, the most important aid to insure success. It should be borne in mind that when a tree is transplanted, no matter how carefully the work is done, it is impossible to take up the entire root system, and therefore, before it is able to care for itself, new roots must be formed to take hold of the soil. In the meantime the moisture is being continually evaporated from the trunk and branches by the action of the wind and sun, and this must be balanced by an artificial supply. During the dry spells and hot weather of the following season, the soil around the base of the tree, for a space wider than the hole, should be frequently watered, but not sufficient to make the ground soggy, and when possible the foliage should be sprayed.

Proper Pruning. As it is impossible to transplant a tree without affecting the root system, it is important, in order to balance the supply and to help avoid excessive evaporation, that the top of the tree should be cut back. The amount of cutting depends entirely on the amount of fibrous root carried by the tree, although hard-wooded varieties usually require harder cutting than soft woods. It is a good rule to remove about three-fourths of last year's growth from all the branches; and in doing this use a sharp knife, making a perfectly clean cut, and taking off the branch or part

of branch either at a fork or close to a strong bud. Be very careful not to leave stumps, as they invariably die back and create decay. The best time for pruning is when the trees are set out, and if they are large it will be found advisable to cut them before they are planted; but in every case be careful to preserve the natural form of the tree, and do not cut back into old heavy wood that does not show buds.

Shrubbery will, as a rule, stand considerable pruning when set out. This must be determined by the shape of the plant, the amount of growing roots it carries, and the season at which it is to bloom. If lilacs and forsythias are planted in the Spring or Fall, and pruned severely, the next season's flowers will be lost, as they make their flowering buds on the old wood; and in case of shrubs of similar habit the pruning should be moderate, or if the plants are sufficiently robust the pruning should be left until the flower is past, and then done before the new growth commences, so that they will set their bloom for the following year. On the other hand, shrubs like *Hydrangea paniculata grandiflora*, which make their bloom on the growth of the current year, should be cut back severely in the early Spring, after the danger of hard freezing is past, as severe pruning induces new growth, and hence a greater abundance of bloom. Shrubbery pruning should be done with a knife, not with hedge shears, and, as a rule, just after the plants have flowered; but in some cases this would prevent the showy fruits and seeds in the Autumn. It is almost impossible to give general directions for pruning shrubbery and to those who wish more information we shall be glad to recommend books which treat the subject very fully.

Planting Perennials. The first thing to be considered is the proper preparation of the soil. The beds, enriched with well-rotted manure, should be dug deep, especially if there is a clay bottom, which should be broken through to give the bed proper drainage and permit deep rooting of the plants, so that they will withstand the drought of Summer. If planted in dry weather, they should be well watered, and throughout the Summer the surface of the beds thoroughly cultivated to keep down the weeds and conserve the moisture. All plants having weak stems should be staked to keep them in their natural position, and as soon as the individual flowers are passed they should be cut off to allow the strength of the plant to go toward forming other flowers instead of seed. This will prolong the period of the bloom. In the Fall cut all plants, except those which are evergreen, to within six inches of the ground, and cover the beds with long manure. In the Spring the long, strawy part of the manure should be removed and the short litter that remains be forked into the beds, to enrich them and aid the soil to retain moisture. A garden-fork should be used in working the beds after planting.
